

Use Guide for Application with **HYDROPONICS**

HYDROPONIC SUPPLEMENT: To provide plants with a more complete diet than can be supplied by hydroponic chemicals, and for superior quality and quantity of produce, use Earth Juice as an organic supplement.

- Mix only what you will need.
- Mix 1 part Earth Juice to 3 parts water and thoroughly agitate. Add to nutrient solution.
- Option: Mix, then cover with a vented top and aerate for 24 hours. Thoroughly agitate and filter through a 100 mesh screen. Add to nutrient solution.

General rates per 1 gallon of mix hydroponic solution. Rates may be adjusted according to individual needs.

Mild 1/4 tsp
Medium 1/2 tsp
Strong 1 tsp
Extra Strong 2 tsp

For vegetative growth, use **Grow**.

For fruiting, flowering and production use **Bloom**.

Add **Catalyst** as directed on product's label.

Include **Meta-K**.

Add the Earth Juice supplement at every nutrient change or addition. Change solution tank every 7-14 days. Flush systems with fresh water during changes.

FINAL FLUSH: Earth Juice may be incorporated into many hydroponic systems to be used as a final flush for determinant crops.

Rates per gallon of water:

- 3 Tbsp **Catalyst**.
- Monitor pH daily.
- Run in system for 5-7 days.
